Office Action Summary

Art Unit: 1714

DETAILED ACTION

1. The final rejection imposed in Paper #8 is withdrawn by the examiner.

Specification

2. The amendment filed 7/12/02 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "The polymeric thickener should be used in an amount sufficient to thicken the oil." See page 10, line 14, of the amended specification..

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

3. Claims 1-5, 9-12, 20, 37 and 38 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no mention in the original specification of a side chain crystalline polymer "being present in an amount such that it thickens the oil"..
4. Claims 1-5, 9-12, 20, 37 and 38 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make

Art Unit: 1714

and/or use the invention. There is nothing in the original specification to guide one of ordinary skill in the art, to determine the level of concentration at which the polymer starts to thicken the oil.

5. Claims 21-25, 39 and 40 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The “at least 2% by weight” concentration level of the side chain crystalline polymer cannot be found in the specification.

6. Claims 21-25, 39 and 40 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the 2-10% by weight concentration range of the side chain crystalline polymer, does not reasonably provide enablement for a 2-100% by weight concentration range of the side chain crystalline polymer. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. See page 10, lines 14-18 of the original specification..

Claim Rejections - 35 USC § 102

7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art,Unit: 1714

8. Claims 1-5, 9-12, 20, 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Mueller 5,281,329..

Claim Rejections - 35 USC § 103

9. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

10. Claims 1-5, 9-12, 20, 32-38, 43 and 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mueller et al. 5,281,329.

Response to Arguments

11. Anticipating the removal of the new matter from the specification and from the claims, the rejections elucidated in Paper #4 are maintained in their entirety. Furthermore the rejections are extended to claims 32-38, 43 and 44, using the same rationale. Since the SCC polymers of Mueller et al. are useful with petroleum oil fractions their use would be obvious with any other organic oily substance. Leaving out the solvents also would have been obvious because of their harmful effects on the environment.
